Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance: The claims are allowable because the prior art fails to teach an edge of the stationary knife is angled to a line along which it moves and the edge forms an acute angle with the roll paper when cutting the roll paper as set forth in claims 1 and 12.

Regarding claims 1 and 12, Onishi et al. (5,904,085), hereinafter Onishi teaches a roll paper cutter for cutting roll paper including a rail that is extending in a longitudinal direction of the rail perpendicular to the roll paper feeding direction. Onishi also teaches a stationary knife that is fixed at and supported by a carriage. Onishi also teaches that the carriage moves along the rail in the longitudinal direction of the rail and the stationary blade is fixed at a non-zero angle with respect to the longitudinal direction of the rail. Onishi also teaches a rotary knife that is pivotally supported by the carriage and is rotated by coming into the contact with the stationary knife when the carriage is moved. Onishi also teaches that the carriage is moved in the longitudinal direction of the rail and the rotary knife and the stationary knife form a cutting edge intersection. Onishi also teaches that the cutting edge intersection crosses and cuts the roll paper in the width direction. However, Onishi fails to teach an edge of the stationary knife is angled to a line along which it moves and the edge forms an acute angle with the roll paper when cutting the roll paper as set forth in claims 1 and 12.

This reference by itself or in combination with the other prior art cited fails to teach the claimed invention set forth in claims 1 and 12.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Kirikoshi et al. (5,937,723), Kohda et al. (2001/0039866), and Kozyrski et al. (4,871,156) teach a roll paper cutter.
